

ABINESH R

Full Stack Developer | PHP · Laravel · REST APIs · MySQL

+91-9629922746 • abineshr312@gmail.com • Chennai, Tamil Nadu • [linkedin.com/in/abineshr03](https://www.linkedin.com/in/abineshr03) • [Abinesh R | Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 4.9+ years of experience in designing, developing, and maintaining scalable web applications using PHP, Laravel, Basic knowledge of ReactJS, JavaScript, MySQL, HTML5, CSS3, and Bootstrap. Experienced in building RESTful APIs using JSON, integrating third-party services, database design, query optimization, authentication using OAuth2/JWT, and background job processing with Laravel Queues and Horizon. Strong understanding of Object-Oriented Programming (OOP), SOLID principles, Git version control, and Agile development methodologies. Passionate about writing clean, reusable, secure, and maintainable code while collaborating effectively with cross-functional teams to deliver high-quality software solutions.

TECHNICAL SKILLS

- **Languages:** PHP, JavaScript
- **Frameworks:** Laravel, AngularJS
- **Frontend:** HTML5, CSS3, Bootstrap, jQuery, AJAX, ReactJS (Basic)
- **Database:** MySQL — Schema Design, Query Optimization, Indexing
- **Backend & APIs:** RESTful API Development, JSON, API Versioning, Laravel Queue & Job, Laravel Horizon
- **Auth:** OAuth2, JWT, API Authentication & Authorization
- **Tools & Practices:** Docker, Git, GitLab, Postman, Minio, Azure Cognitive Services, Agile/Scrum

WORK EXPERIENCE

Software Developer (Contract) — Covalense Digital Solutions | Bangalore, Karnataka Dec 2025 – Feb 2026

- Delivered backend features in PHP/Laravel for Khedmah, a food delivery platform serving 10K+ active users, spanning order management, driver assignment, and real-time notifications built on MySQL and REST APIs.
- Diagnosed and resolved 12+ production issues through log analysis, API debugging, and SQL query optimization, cutting recurring production incidents by 45%.
- Strengthened API reliability by standardizing contract reviews during peer code review, reducing post-release defects by 35% and improving backend-frontend collaboration.

Senior Web Developer — Netaxis IT Solutions | Chennai, Tamil Nadu Nov 2020 – Jun 2025

- Maintained backend infrastructure across 5+ production Laravel and AngularJS applications serving 10K+ monthly active users, partnering with the infrastructure team to sustain 99.5%+ uptime.
- Designed and shipped 15+ RESTful APIs for web and mobile clients, standardizing response formats and error handling to improve response time by 30% and reduce frontend integration issues.
- Cut peak server load by 40% and response latency by 25% by migrating synchronous tasks — email notifications, PDF generation, third-party API calls — to asynchronous Laravel Horizon queues.
- Improved MySQL query performance by 25% on tables exceeding 1 million records by profiling with Laravel Debugbar, analyzing EXPLAIN execution plans, and applying targeted indexing — without altering the schema.
- Implemented OAuth2 and JWT authentication across 3 multi-tenant applications, including token expiration, refresh tokens, and role-based access control, reducing auth-related support tickets by 30%.
- Led a team of 6 developers through sprint planning, code review, and mentoring on SOLID principles and Laravel best practices, raising overall code quality.
- Standardized GitLab branching strategy and merge request templates, cutting merge conflicts by 40% and improving release turnaround time by 20%.

KEY PROJECTS

NamePage | *Laravel · MySQL · AJAX · Azure Text-to-Speech API*

- Built a global name-pronunciation platform on Laravel, MySQL, Azure Text-to-Speech API, and AJAX, supporting 50K+ registered users.
- Integrated 20+ RESTful APIs covering pronunciation services, gamification, user profiles, leaderboards, and administration.
- Designed and tuned a MySQL database handling 500K+ pronunciation records, improving query performance through indexing and schema refinement.
- Implemented secure authentication and role-based authorization for 50K+ registered users across user and administrator portals.
- Delivered the application on Laravel MVC architecture across 10+ production deployments via Git-based version control.

TrackMyDomains & TrackMyBills | *Laravel · MySQL · Laravel Scheduled Jobs*

- Built domain-portfolio and billing management applications used by 10+ enterprise clients to centralize domain registrations, renewals, billing, and approval workflows.
- Designed role-based approval workflows spanning 4+ user roles for secure administrator and business-user access control.
- Automated 1K+ monthly emails via Laravel Scheduled Jobs (Cron) for domain renewals, invoice generation, and approval status updates, eliminating manual tracking and reducing missed renewals.

EDUCATION

Bachelor of Engineering — Computer Science and Engineering

Adhiparasakthi Engineering College, Melmaruvathur | 2016 – 2020
