

ABINESH R

Senior Backend Engineer | PHP · Laravel · REST APIs · MySQL

+91-9629922746 • abineshr312@gmail.com • Chennai, Tamil Nadu • [linkedin.com/in/abineshr03](https://www.linkedin.com/in/abineshr03)

PROFESSIONAL SUMMARY

Backend Engineer with 4.9 years of experience building and maintaining scalable Laravel applications, RESTful APIs, and high-performance MySQL databases. Skilled in optimizing application performance, reducing query execution time, implementing secure authentication, and delivering reliable production releases. Experienced in API development, database optimization, background job processing, and collaborating with cross-functional Agile teams to build scalable backend solutions.

TECHNICAL SKILLS

Programming Languages:	PHP, JavaScript
Frameworks & Libraries:	Laravel, AngularJS, Bootstrap
Frontend Technologies:	HTML5, CSS3, AJAX
Database:	MySQL - Database Schema Design, Query Optimization, Database Indexing
Backend Development:	RESTful API Development, API Versioning, Laravel Queue, Laravel Horizon, Background Job Processing
API & Auth:	OAuth2, JWT, API Authentication, Authorization
Tools & Platforms:	Docker, Git, GitLab, Azure Cognitive Services, Minio
Development & Testing Tools:	Postman

WORK EXPERIENCE

Software Developer — Covalense Digital Solution

Dec 2025 – Feb 2026

- Built backend features for **Khedmah**, a food delivery platform serving **10K+ users**, including order management, driver assignment, and real-time notifications using **Laravel, MySQL, and REST APIs**.
- Diagnosed and fixed **12+ production issues** by analyzing logs, debugging APIs, and optimizing SQL queries, reducing recurring production incidents by **45%**.
- Strengthened API reliability by standardizing API contract reviews during peer code reviews, reducing post-release defects by **35%** and improving collaboration between backend and frontend teams.

Senior Web Developer — Netaxis IT Solution

Nov 2020 – Jun 2025

- Developed and maintained backend systems for **5+ Laravel and AngularJS applications**, supporting **10K+ monthly active users** while working closely with the infrastructure team to ensure **99.5%+ application availability**.
- Designed and delivered **15+ RESTful APIs** for web and mobile applications, standardizing API responses and error handling, improving response time by **30%** and reducing frontend integration issues.
- Increased application performance by replacing synchronous tasks with **Laravel Horizon queues** for email notifications, PDF generation, and third-party API integrations, reducing peak server load by **40%** and response latency by **25%**.
- Optimized 20+ MySQL queries on tables with over 1 million records by profiling SQL queries with Laravel Debugbar and analyzing execution plans using EXPLAIN, implementing indexing and query optimization techniques that improved query performance by 25% without altering the database schema.
- Implemented **OAuth2** and **JWT authentication** for **3 multi-tenant applications**, including token expiration, refresh tokens, and role-based access control, reducing authentication-related support issues by **30%**.
- Led a team of **6 developers** by participating in sprint planning, code reviews, and mentoring junior engineers on **SOLID principles** and Laravel best practices, improving overall code quality.
- Standardized **GitLab branching strategies** and merge request templates, reducing code merge conflicts by **40%** and improving release turnaround time by **20%**.

KEY PROJECTS

NamePage | *Laravel · MySQL · AJAX · Azure Text-to-Speech API*

- Built a global name pronunciation platform using **Laravel**, **MySQL**, **Azure Text-to-Speech API**, and **AJAX**, supporting **50K+ registered users**.
- Integrated **20+ RESTful APIs** for pronunciation services, gamification, user profiles, leaderboards, and administration.
- Designed and enhanced a MySQL database handling over **500K pronunciation records**, improving query performance through indexing and schema refinement.
- Implemented secure authentication and role-based authorization for **50K+ registered users**, ensuring secure access across user and administrator portals.
- Delivered the application using **Laravel MVC Architecture**, supporting 10+ production deployments through Git-based version control and infrastructure collaboration.

TrackMyDomains & TrackMyBills | *Laravel · MySQL · Laravel Scheduled Jobs*

- Developed **domain portfolio and billing management applications** used by **10+ enterprise clients** to centralize domain registrations, renewals, billing, and approval workflows.
- Created **role-based approval** workflows supporting **4+ user roles**, providing secure access control for administrators and business users.
- Implemented **Laravel Scheduled Jobs (Cron)** and automated email notifications for domain renewals, invoice generation, and approval status updates, **delivering 1K+ emails per month** while eliminating manual tracking and reducing missed renewals.

EDUCATION

Bachelor of Engineering — Computer Science and Engineering

Adhiparasakthi Engineering College, Melmaruvathur | 2016 – 2020
